E-Mail: info@cspe.com

A Fact Sheet on CSPE

The California Society of Professional Engineers (CSPE) was chartered as a state affiliate of the National Society of Professional Engineers on January 21, 1949. For over sixty years, CSPE has been speaking uniquely for the practice of all engineering fields in California. It is the voice of all engineers in protecting the public safety and well being. CSPE maintains its central office in Sacramento, California to work closely with legislators and state agencies. Its members are practicing professionals in civil, electrical, mechanical, and all other engineering disciplines. They work in government, private practice, industry and education. 90% of members have an engineering license to demonstrate their commitment to the highest professional standards.

CSPE has also established the CSPE Education Foundation to promote the engineering profession to the general public. The Education Foundation is a partnership between CSPE members and volunteers and sponsors MATHCOUNTS, a state-wide mathematics competition for middle school students to encourage proficiency in mathematics and prepare students for a possible career in engineering. The Education Foundation also awards grants to students pursuing engineering licenses and degrees in California's colleges and universities.

Supporting Organization Program

CSPE is a state society of the National Society of Professional Engineers.

CSPE enhances and promotes the distinct value that licensed Professional Engineers provide through exceptional engineering services that place public health, safety and welfare above personal gain.

Upon acceptance of your application and \$250 annual dues, your company will be welcomed as a CSPE Supporting Organization in *CSPE Online*.

Furthermore, each monthly issue of the magazine will include a list of all Supporting Organizations. Since the magazine is delivered to numerous companies and universities/colleges as well as all CSPE members, many of whom are decision makers in their own firms, this exposure can provide great benefits to you as a Supporting Organization.

Supporting Organizations are encouraged to contribute professional information and articles for publication in *CSPE Online* and on the CSPE website.

You will gain access to CSPE members and can make presentations at local Chapter and State meetings.
